## EXPERIENCE HISTORY

### INTERNSHIP

BROTOTYPE / 08/2023 - PRESENT

#### E-commerce Web Application with Node.js, Express, and MongoDB

Engineered a robust e-commerce web application from scratch using Node.js, Express, and MongoDB, catering to both user and admin functionalities. Employed the MVC architecture pattern for efficient code organization and maintainability.

Git repo : - <https://github.com/tonykuriakose/eCommerce.git>

#### 2.React Todo List Application

Created a Todo List Application using React, featuring task creation and interactive checkboxes for efficient task management.

Git repo : - <https://github.com/tonykuriakose/todolist.git>

#### 3.Netflix Clone with React

Developed a Netflix Application utilizing React, Axios, IMDb, and React-YouTube. Features include a navbar, banner, and row posts for seamless content navigation and presentation.

Git repo:- <https://github.com/tonykuriakose/netflix.git>

#### 4.OLX Clone with React

Developed an OLX Application utilizing React, Firebase, and React Router. Key features include dynamic routing for seamless navigation, real-time database integration with Firebase for listing management, and a user-friendly interface for buying and selling items

Git repo:- <https://github.com/tonykuriakose/olx.git>
